

## NEW FOR ISE 2012: THE IP SECURITY PAVILION

With the growing use of IP networks as a communication backbone in enterprises of all sizes and kinds, the segments of security, surveillance, access control and infrastructure are rapidly growing in importance to the AV systems integration community.

ISE's new IP Security Pavilion, located in Hall 9 of the Amsterdam RAI, has been designed to introduce this new area of business and technology activity to the Integrated Systems Europe audience of systems integrators, consultants, distributors and end customers. As well as exhibition space, the Pavilion will include a networking area where attendees can meet informally over refreshments.

A joint venture between ISE and Global Fairs TT-Messe, the IP Security Pavilion gives the professional AV community an insight into how security, surveillance, access control and other technologies can be added to an AV-IT network, adding value to the end customer and giving resellers another revenue-generating opportunity.

IP SECURITY PAVILION

visiomatic 

**VISIOMATIC GMBH**

High-tech in combination with exclusive design! visiomatic GmbH founded 1999 in Stuttgart is the global technology leader of Lifestyle Automation. visiomatic: all you can automate!

At the ISE 2012 visiomatic presents its newest creation in the field of Communication, the revolutionary visiTor solution for mobile communication with a video intercom station (e.g. Siedle, Ritto, TCS, Gira, etc.). Completely produced in Germany, the visiTor permits you to see from your iPhone or iPad who is ringing at the door. And if you have more than one video camera, you can even switch view between them and follow any movement outside your home.

**visiTor is the most useful innovation since the invention of the doorbell!**

**EET GROUP**

SafeVision is a division of the EET Group. SafeVision specializes in the value-based distribution of video surveillance equipment and offers sales support, technical support, site visits to end-customers to identify their needs and plan projects, help with deployment as well as training of sales staff, technicians and end-users. SafeVision has from the outset had the goal of being a value-based distributor to the security sector, and sells exclusively to dealers, security companies and electrical contractors. We are happy to advise individuals and businesses wishing to clarify options and needs, and refer them subsequently to our dealers so that they can work out prices and offers. For further information please visit [www.safevision.eu](http://www.safevision.eu) or [www.eetgroup.com](http://www.eetgroup.com)

On the show we will present products and solution from the main Vendors in the surveillance industry. Manufacturers like Axis, A-soni, Cameraman, IQeye, Teknosystem, Milestone, Mirasys and Ernitec.

**SSS SIEDLE**

**SIEDLE**

The Siedle enterprise, a family-run company now in its seventh generation, was founded around 1750. Beginning as a supplier to the Black Forest watch industry, at the end of the 19th century Siedle turned into the German pioneer of telegraphy and telephony. In the 20th century, the company focussed on door and house intercoms.

Today, Siedle is a European leader in building communication and continues to produce at its ancestral premises. The long-established company is known for high-class technology, uncompromising quality and prize-winning design.

**Product range: At the threshold**  
Siedle brought the first door loudspeakers onto the market in 1935. Since then the long-established company has concentrated its ingenuity on further perfecting the intercom. Today, Siedle develops, produces and integrates everything that serves the purposes of communication around and in the building.
